BigPod

Stylish speakers for both stereo and surround

The clue is in the title; in comparison to the MiniPod MK2, the BigPod is considerably larger and was added to the range after demands for a larger speaker that could deliver more bass for larger rooms. Although BigPod is a much larger speaker, it retains the same agile performance of its smaller sibling.

For those with larger living spaces who wish to make a statement both with sound and design, the BigPod is the perfect choice.
